SUMMARY

Computer Science and Engineering graduate with hands-on experience in Python, Java, Data Structures and Algorithms, OOP, web development, and database management. Built four end-to-end applications spanning full-stack web platforms, interactive front-end apps, and machine learning — a photographer booking platform, an interactive quiz app, a music/video streaming app, and a weather forecasting system. Seeking an opportunity as a Software Developer / Python Full-Stack Developer to contribute to real projects and keep growing technically.

SKILLS

Frontend: HTML, CSS, JavaScript, React.js, Responsive Design

Backend: Node.js, Express.js, Flask, Django, REST APIs

Database: MongoDB, MySQL, LocalStorage

Languages: Python, Java, C, C++, JavaScript

Data & ML: Pandas, NumPy, Scikit-learn, Matplotlib, Jupyter Notebook

Auth & Security: JWT, bcrypt

Design: UI/UX, Figma

Tools & Platforms: Git, GitHub, VS Code, Postman, MS Excel, WordPress

Soft Skills: Attention to Detail, Communication, Problem Solving, Project Management, Time Management, Team Collaboration, Quick Learning, Leadership

Languages Spoken: English, Malayalam, Tamil

PROJECTS

CLICKSY — Online Photographer Booking Platform

React.js, Node.js, Express.js, MongoDB, REST API, JWT

- Built a full-stack booking platform connecting photographers and clients, with search and filter by location, category, pricing, ratings, and availability.
- Implemented portfolio management, package comparison, booking requests, reviews & ratings, and an admin module across 3 user roles.
- Secured with JWT authentication and bcrypt password hashing; used Cloudinary/Firebase for image storage and Stripe/Razorpay for payments.

QUIZMASTER — Interactive Quiz Application

HTML5, CSS3, JavaScript, LocalStorage

- Built an interactive web-based quiz app with multiple categories and timed rounds to make learning more engaging.
- Added instant explanations after each question, plus progress tracking, performance levels, and an achievements system.
- Persisted quiz statistics and achievements locally so users can track improvement across attempts.

VIBRA — Music & Video Streaming App

HTML5, CSS3, JavaScript, LocalStorage

- Developed a music and video streaming web app with an interactive playback experience, including search and queue management.
- Implemented shuffle, repeat, favorites, and recently-played tracking, with full playback controls.
- Persisted playback state and user preferences locally for a consistent experience across sessions.

Weather Forecasting System

Python, Flask, Pandas, NumPy, Scikit-learn, Matplotlib

- Developed a machine learning application that preprocesses historical weather data to identify patterns and generate short-term forecasts.
- Covered the full ML pipeline — data collection, preprocessing, feature selection, model training, testing, and prediction — across temperature, humidity, wind speed, and pressure.
- Built a Flask-powered web interface connecting the trained model to user-facing forecast queries, with CSV/MySQL for data storage.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering | CGPA: 7.48 | 2022 – 2026

A.P.J. Abdul Kalam Technological University

SNM Institute of Management and Technology, Maliankara, Ernakulam

ACHIEVEMENTS & INTERNSHIPS

- Python Programming Internship — Metaloop Global IT Services, Kochi (7 Days)
- Cyber Security Internship Program (7 Days)
